CAREER OBJECTIVE

Aspiring Software Developer skilled in Java, Python, web technologies, and SQL, seeking to build reliable applications, solve practical problems, and contribute to a collaborative development team.

EDUCATION

B.Tech – Artificial Intelligence and Data Science 2023 – 2027
Muthayammal College of Engineering, Rasipuram (Affiliated to Anna University) CGPA: 8.2
Higher Secondary Certificate (HSC – 12th Grade) 2023
Government Higher Secondary School, State Board Percentage: 81.33%
Secondary School Leaving Certificate (SSLC – 10th Grade) 2021
Government Higher Secondary School, State Board Percentage: 100%

TECHNICAL SKILLS

Programming Languages: Java, Python
Web Development: HTML, CSS, JavaScript
Databases: MySQL
Cloud & Tools: Git, GitHub

INTERNSHIP EXPERIENCE

Data Science with Python – 1-Week Internship
Immaculate Technologies, Salem

- Applied Python to data cleaning, analysis, visualization, and predictive modeling.
- **Tech Stack:** NumPy, Pandas, Matplotlib, Seaborn.

PROJECTS

Handwritten Digit Recognition using CNN

- Built a Convolutional Neural Network (CNN) using TensorFlow and Keras on the MNIST dataset containing 70,000 images to classify handwritten digits from 0–9 with high accuracy.
- Implemented image preprocessing, normalization, CNN design, training, and evaluation using accuracy and loss metrics.
- Tuned model parameters to reduce misclassification and improve performance on unseen data.
- **Tools & Technologies:** Python, TensorFlow, Keras, MNIST, Naan Mudhalvan.
- **GitHub:** github.com/naveen-eswaran/handwritten-digit-recognition-cnn

Face Recognition Attendance System

- Developed a real-time face recognition attendance system using Python and OpenCV.
- Implemented face encoding and matching with the `face_recognition` library; reported 100% accuracy on known faces.
- Built a PyQt5 GUI with live camera feed, attendance table, Excel reports, and daily record management.
- Automated attendance marking, prevented duplicate entries, and stored name, date, and time in CSV files.
- Packaged the application as a Windows installer using NSIS.
- **Tech Stack:** Python, OpenCV, face_recognition, PyQt5, pandas, openpyxl, NSIS.
- **GitHub:** github.com/naveen-eswaran/face_recognition_attendance_system

HACKATHON

HackIndia 2025 – Participant

- Built a full-stack web application using React.js and Node.js during a 24-hour hackathon.
- Developed REST APIs connecting the frontend to a MySQL database.
- Contributed to database schema design, API integration, and UI rendering.
- Used Git and GitHub for collaborative version control.

WORKSHOPS

- Participated in the *Future of Generative AI – Trends and Innovations* workshop, organized by the Department of Information Technology, Kongu Engineering College, Perundurai, Erode.
- Participated in the *Entrepreneurship in AI* workshop, organized by the Department of Artificial Intelligence and Data Science, Mahendra Engineering College, Namakkal.

ACHIEVEMENTS

- Served as Campus Ambassador for Alfrah Cognix Innovations Pvt. Ltd., promoting initiatives and engaging with students.

SOFT SKILLS

Teamwork | Adaptability | Leadership
